

Author's Note

Hello, my name is Garrett Durbin. Thank you for taking a few moments to look at my “Multiple Feedback Form Tool” exercise. I’m from rural Hamilton, Missouri, and I’m very excited for the chance to apply and work for MidwayUSA. I’ve included a few thoughts below on my project for this exercise. If there are revisions to this exercise or anything else I can do to help improve my standing as a candidate for this position at MidwayUSA please let me know. I can be reached at:

garrettdurbin@gmail.com

Bootstrap: I know from the initial phone interview, having mobile first / responsive web pages is important at MidwayUSA. While I believe I can do everything in this exercise without Bootstrap, Bootstrap helps ensure this page will resize smoothly across a variety of screen sizes. Additionally, I believe it helps the style look clean and organized. In my CSS for this project, I include several Bootstrap classes and media queries. I include these classes and queries as plain CSS, and I only include what I use for this exercise. I found these Bootstrap classes and queries on their GitHub page at the following link: <https://github.com/twbs/bootstrap/blob/main/dist/css/bootstrap.css>.
